

In the Claims

Please amend reissue claims 25, 30, 33 and 38 as follows:

Sub
B17

25. Apparatus as defined in Claim 24 wherein the support member is intersected by a window and each extreme end portion extends into the window but does not extend through the window.

Sub
B17

30. Apparatus as defined in Claim 25 wherein the support member is intersected by a window and the extreme end of said free end portion of each contact member extends into the window a sufficient distance to contact a terminal ball positioned in the window between the center of the terminal ball and the face of the device from which such terminal ball depends.

33. Apparatus as defined in Claim 32 wherein the support member is intersected by a window and each extreme end portion extends into the window but does not extend through the window.

38. The combination defined in Claim 35 wherein the support member is intersected by a window and further including means for moving said free end portions with respect to the window.
